SUMMARY

Computer Science student and Backend Developer specializing in the Laravel and PHP framework. Experienced in database design, RESTful API development, and system logic. Proficient in integrating backend systems with modern frontend tools like React and Tailwind CSS to build functional, user-centric web applications.

TECHNICAL SKILLS

Backend:	PHP, Laravel (MVC), RESTful APIs, PDO
Database:	MySQL, Database Schema Design, Migrations
Frontend:	JavaScript, React.js (Basics), Tailwind CSS, HTML5, CSS3
Programming:	C++, Python, C#, Prolog (Logic Programming)
Environment:	Git/GitHub, XAMPP, Ngrok, Postman

KEY PROJECTS

BloodBank Web Application

Laravel, React, MySQL

GitHub: github.com/Baskootaa/BloodBank Live Demo: blood-bank-3hol.vercel.app

Integrated system connecting donors, hospitals, and patients.

- Architected the complete backend system using Laravel for secure data management.
- Designed relational database schemas to manage complex user and inventory relationships.
- Developed RESTful APIs for seamless communication between Laravel and React.
- Built an administrative dashboard to manage urgent requests and monitor stocks.

Gym Membership Management System

PHP, PDO, MySQL

GitHub: github.com/Baskootaa Live Demo: gym-master-q1eu.onrender.com

- Engineered automated backend tracking scripts (such as `expiring.php`) using advanced PDO SQL joins to monitor subscription durations and manage member renewals.
- Designed relational database schemas to efficiently track member details, subscription packages, and payment statuses.
- Deployed and optimized the live web application on cloud platforms ensuring high availability.

Academic Programming Tasks

Prolog, Python

- Developed logical solvers and filtering algorithms using Prolog for complex logic tasks.
- Created automation scripts in Python for data organization and text processing.

EDUCATION

Bachelor of Computer Science / Software Engineering

Mansoura University (2023 - Present)

Faculty of Computers & Information Sciences. Relevant Coursework: Algorithms, Data Structures, Database Systems, Logic Programming, Operating Systems, Artificial Intelligence.

EXPERIENCE

Freelance Web Developer

- Developing custom web solutions and managing backend environments.
- Troubleshooting development setups and optimizing performance.

LANGUAGES

Arabic: Native | English: Technical Proficiency
