SUMMARY

Computer Science student and Backend Developer specializing in the Laravel and PHP framework. Experienced in database design, RESTful API development, and system logic. Proficient in integrating backend systems with modern frontend tools like React and Tailwind CSS to build functional, user-centric web applications.

TECHNICAL SKILLS

Backend

PHP

Laravel (MVC)

RESTful APIs

PDO

Database

MySQL

Database Schema Design

Migrations

Frontend

JavaScript

React.js (Basics)

Tailwind CSS

HTML5

CSS3

Programming

C++

Python

C#

Prolog (Logic Programming)

Environment & Tools

Git / GitHub

XAMPP

Ngrok

Postman

KEY PROJECTS

BloodBank Web Application

GitHub: github.com/Baskootaa/BloodBank | Live Demo: blood-bank-3hol.vercel.app

Tech Stack: Laravel, React, MySQL

- Architected the complete backend system using Laravel for secure data management.
- Designed relational database schemas to manage complex user and inventory relationships.
- Developed RESTful APIs for seamless communication between Laravel and React.
- Built an administrative dashboard to manage urgent requests and monitor stocks.

Gym Membership Management System

GitHub: github.com/Baskootaa | Live Demo: gym-master-qleu.onrender.com

Tech Stack: PHP, PDO, MySQL

- Engineered automated backend tracking scripts (such as expiring.php) using advanced PDO SQL joins to monitor subscription durations and manage member renewals.
- Designed relational database schemas to efficiently track member details, subscription packages, and payment statuses.
- Deployed and optimized the live web application on cloud platforms ensuring high availability.

Academic Programming Tasks

Tech Stack: Prolog, Python

- Developed logical solvers and filtering algorithms using Prolog for complex logic tasks.
- Created automation scripts in Python for data organization and text processing.

EDUCATION

Bachelor of Computer Science / Software Engineering (2023 - Present)

Mansoura University - Faculty of Computers & Information Sciences

Relevant Coursework: Algorithms, Data Structures, Database Systems, Logic Programming, Operating Systems, Artificial Intelligence.

EXPERIENCE

Freelance Web Developer

- Developing custom web solutions and managing backend environments.
- Troubleshooting development setups and optimizing performance.

LANGUAGES

Arabic: Native | **English:** Technical Proficiency
